

11 February 1963

MEMORANDUM FOR: Assistant for Administration

ATTENTION:

SUBJECT: Contract for Services

1. It is desired that our service contract for [redacted] be terminated as of 28 February 1963.

2. This action is being taken in order that [redacted] may be used as an engineer, applying the experience he has gained while in Washington, on the modification of NFIC's [redacted] electronic rectifier at the [redacted].

3. It is our plan to have [redacted] return to Washington for a short period, in about March 1964, after the delivery of the modified [redacted] electronic rectifier. It is also planned that a qualified Army Map Service representative be temporarily assigned duty for the last several critical months of fabrication of the modified equipment at the [redacted] plant. This man should be one who can also work with [redacted] upon his return. The selection of this nominee should be made by [redacted] Army Map Service.

4. Should, for any reason, our negotiations with [redacted] for the modification program not be successful, it is still our desire to terminate our contract for [redacted] on 28 February 1963.

5. This termination should in no way reflect upon [redacted] performance or capabilities. His record of service with us and Army Map Service has been excellent. Without his help the [redacted] electronic rectifier could not possibly have served the purpose for which it was designed. He figures to be a key engineer in the redevelopment and modification of the equipment to meet general Intelligence Community specifications.

6. Since [redacted] will be working in California on the development of equipment for us within the Intelligence Community, it is desired that he retain his present security clearances until the modification program is either completed or it is determined that it will not be undertaken. This will permit him to maintain close liaison with the using components.
